

NEVO[®]
New Evolution in Home Control

NevoStudio Pro 3.0 - Configuration software that enables Nevo Pro Series controllers (NevoS70 and NevoQ50) to become powerful 2-way control solutions.

.Nevo Plug-ins

2-way plug-ins developed with industry leaders for seamless and efficient home integration

Initial .Nevo Plug-ins are available for Sonos, Kaleidescape, iPort, and Imerge. More plug-ins will become available in the dealer section on mynevo.com. An intuitive wizard driven interface allows for easy customization.

Nevo Widgets

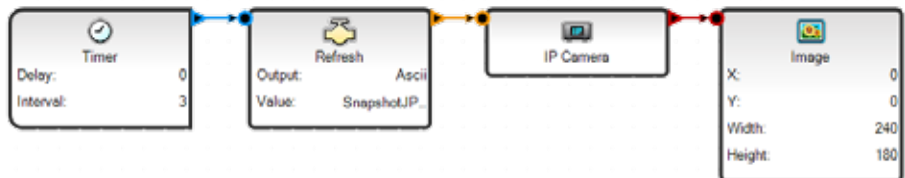

2-way scripting without the scripting

A drag and drop, building block style workspace, to create widgets that can send commands and receive feedback. Nevo Widgets offer ultimate flexibility to create bi-directional interfaces such as a visual volume level indicator for an AV receiver, a whole home security interface, or integration with Russound and other manufacturers. Nevo Widgets can even be exported and shared with others.

Example:

Every 3 seconds ... send this command... to this IP camera... display returned image.

FEATURES

- Over 18 new usability enhancements allow installers to build advanced control solutions faster than ever
